The new web based Open Green Map is a fantastic resource that allows you to access far more detailed information than can be shown on this leaflet. It is easy to use and interactive; you can suggest sites to go on the map yourself, you can make comments and ask questions, you can even upload your own photos of places onto the map for everyone to see. The Swansea OGM map is county wide and shows over 300 places that help Swansea to be a more sustainable place. Many of the photos on the map have been taken by residents taking part in Sustainable Swansea's Digital Photography Training. Check out www.sustainablewswansea.net to access the Swansea OGM.

This map uses the International Green Map System. Green Map System has been promoting sustainable community development around the world since 1995, by creating maps of local resources, using their Green Map icons which can be recognised in any language. Over 500 locally-led map projects in over 50 countries have successfully published Green Maps, used by millions of people to connect with green living, nature, social and cultural resources near home and while travelling. Swansea has had a Green Map since 2005 and is on its 5th leaflet publication, and 3rd version of the interactive Swansea Green Map.

Hello!

Welcome to the community map of central Swansea, which shows loads of places that help to make Swansea a happy, healthy and sustainable place. Local residents and volunteers have helped to create this map; investigating what's out there, writing explanations, taking photos, and getting involved!

This map highlights the fantastic array of things going on in the area. You can use your map to help you get more involved in your local community, become more active, help improve the environment, and become more sustainable. The map shows the location of places such as community projects, recycling points, parks and public spaces, charity shops, places to eat and buy local or organic food, places to buy ethical products, and much more!

What is Sustainability?

Concerns at the problems arising from the impact we have on the world have grown during recent decades. Over consumption, increasing transportation, growing waste, and depletion of natural resources affect the World around us. We are seeing the impacts of these global problems in our own lives with prices for energy and fuel rising, increasing pollution, loss of species, and growing personal and national debt. Sustainability is about living in a more considerate way, making informed choices to look after our environment and communities, whilst ensuring long-term economic stability.

As individuals our actions may seem small, but together we can bring about a huge positive change!

Disclaimer: The map was created through community consultation, volunteer work and partnership collaboration. Inclusion on the map does not necessarily mean that Sustainable Swansea endorses their activities, and also omission from the map in no way implies that an organisation is not making a relevant contribution to Sustainable Development in Swansea. Sustainable Swansea

We help to make Swansea a more sustainable place to live, work, visit, and enjoy, by working with communities, organisations, and individuals to inspire action! Sustainable Swansea runs projects and initiatives including:

On the Trail: a collection of locations such as Swansea Community Farm, The Environment Centre, Swansea Foyer, and Swansea Botanical Gardens, which show sustainability in action.

Traiblazers; fun environmental activities for children aged 8 - 14 at various locations on the trail during the school holidays.

Traiblazers II; supporting volunteering and training opportunities for young people aged 14-25 at Trail sites.

Sustainable Swansea Awards Scheme; rewarding sustainable action by Schools, Businesses, Community Projects, Public Agencies, and individuals.

Green Map Series: A growing collection including a Swansea-wide map, Planet Penlan Map, Swansea Bay Alternative Travel Map, and online interactive maps. This is the latest member of the series.

Castle Communities First

Communities First is a Welsh Assembly Government initiative aimed at regenerating selected communities in Wales. We are community-led so the Castle Communities First team works closely with local groups, organisations and individuals living and working within the Castle Ward, to help them bring about positive change and improve everyday lives. This includes helping local people to secure employment, gain access to training, educational and volunteering opportunities, help with organising events and activities, and much more.

The Castle team also work in partnership with statutory, voluntary and charitable agencies and organisations in order to bring services into the community that help address community issues and improve the environment.

Get involved

If you'd like to get involved or would like more information please contact Helen, Hannah, Afsa or Claire on **(01792) 476812** – we look forward to hearing from you.

Ways to save you money *and* save the environment!

Energy

The average home can save £340 a year by being more energy efficient! Here are a few ideas;

- Turning down your heating by 1°C can save you **£65** per year on your bill.
- When old light bulbs die, replace them with energy efficient ones, which last up to nine times longer, and save an average of **£9** per year per bulb.
- Turn off electrical items at the wall, turning electrical items off standby saves approximately **£40** per year.
- Un-plug phone chargers when not in use; they are still using electricity even without a phone attached!

Reduce heat loss in the home:

- Check for drafts around doors, floors and windows, and seal, or block using draft excluders, which can save **£10-20** a year.
- Insulating your water pipes will save you about **£10** per year.
- Put reflectors behind your radiators so that less heat is absorbed by the wall, and more heat is reflected into the room; you can make your own using cooking foil!

Food

Each month, the average family throws away **£50** of food that was bought but not eaten, which also has serious environmental implications. Before you go shopping, make a list and stick to it!

Grow your own veg! This can help reduce your weekly shopping bill. Not got much space or just starting out? Try some tubs or even a hanging basket of strawberries / cherry tomatoes. For the more adventurous, contact the council to find your local allotment, and get stuck in!

Re-use

Do you need new furniture at low cost? Got old furniture and household items you want to get rid of?

There are several local charities in Swansea that sell low cost and reconditioned good quality furniture, and will also take away unwanted items.

If you do have to drive, make sure your car is not costing you extra money!

- Check that your tyre pressure is correct as this can account for **10%** of petrol costs.
- Air conditioners can increase fuel consumption by between **5 and 10%**.
- Remove unnecessary weight from the boot, and remove roof racks when not in use.
